

PAT

The future of Open Source Interactive OLAP
.....honest

PAT.... Er What?

We used to have a slide explaining the name, but we don't know ourselves so I removed it.

What PAT is.....

- Thin client, 100% Open Source OLAP Analysis Tool
 - Browse
 - Explore
 - Slice and Dice
 - Visualize
 - Business user friendly JPivot replacement
 - Standalone and BI Server Integration
 - Works with any XML/A data source (Mondrian, MS Analysis Services, SAP BW....)
- 

Some Quick Stats

- Completely Community Driven
- 29,391 Lines of Java Code
- 2 Core Developers (Part Time)
- 8 Unique SVN Committers
- \$467k Projected Project Cost
(Stats from Ohloh)

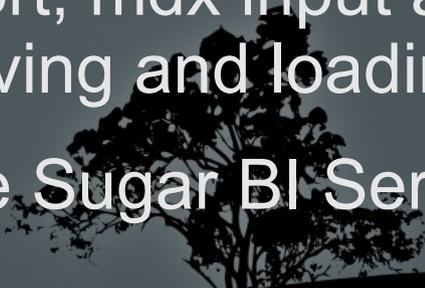

PAT Technologies

- Frontend:
 - GWT(<http://code.google.com/webtoolkit>)
 - GWT Mosaic(<http://code.google.com/p/gwt-mosaic>)
 - HTML + CSS
 - Flash (for now)
- Backend
 - Normal Java + GWT Servlets
 - Spring Security
 - Olap4J(<http://olap4j.org>)

PAT History

- December 2008 Tom and Paul fork Halogen
 - February 2009 – 0.1 (gwt-ext, maven)
 - April 2009 – 0.2 (gwt-mosaic, basic DnD, XML/A)
 - June 2009 – 0.3 (GWT 1.6, new table, multiple queries)
 - July 2009 – 0.4 (GUI Improvement, advanced table, basic bi-server integration)
 - October 2009 – 0.5b (Persistence layer, GUI rewrite, basic charting, dimension browser, drill support)
 - March 2010 – 0.6 (New and improved BI Server plugin, new query design widgets, excel export, mdx input and color coded formatting, beta query saving and loading)
 - Near future – 1.0 released alongside the Sugar BI Server
- 

PAT Demo

What can PAT do already?

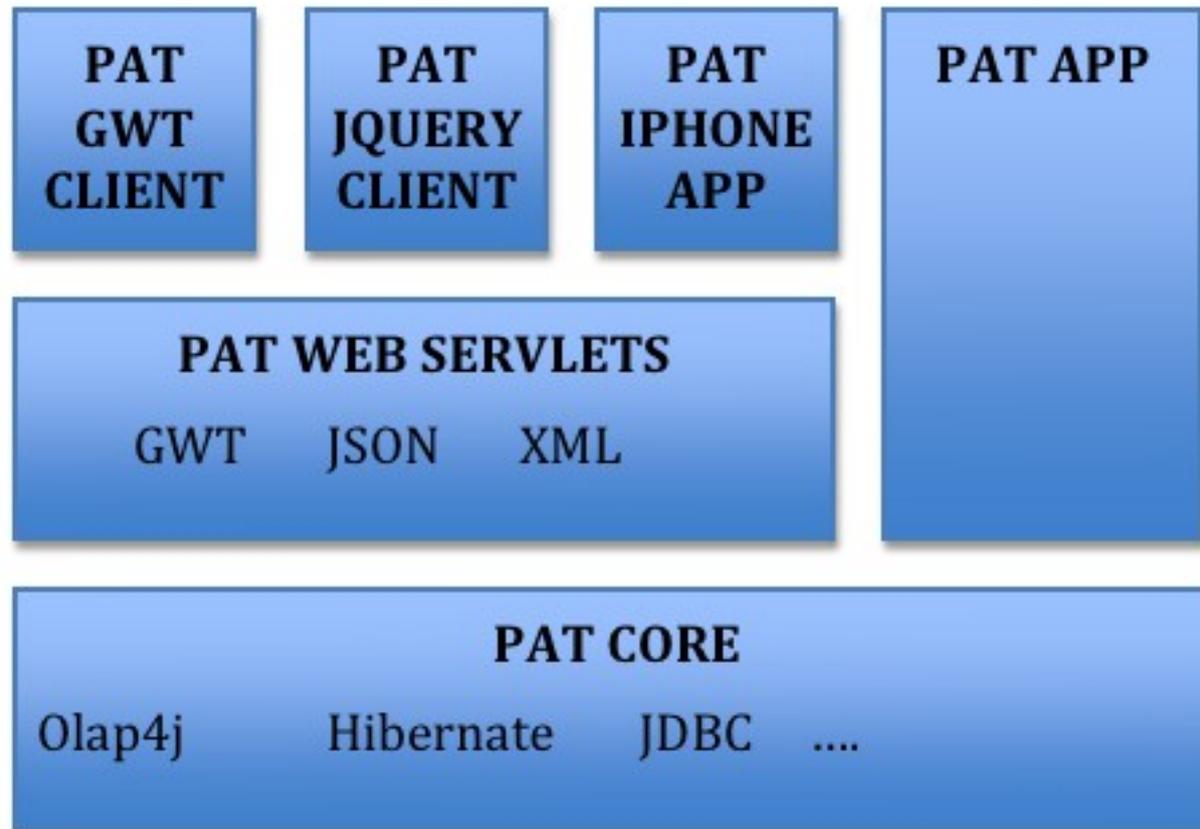

- Connect to its internal Mondrian instance
 - Connect to any XML/A data source
 - Discover all available cubes
 - Query without any user written MDX
 - Tabbed multiple query support
 - Drag and drop query generation
 - Browse your dimensions
 - Drill down(drill expand, drill replace)
 - Drillable Charts
 - MDX query support
 - Swap axis
 - Sort
 - Translated into 8 languages
 - Excel export
 - Query saving and loading
- 

What is on the PAT roadmap?

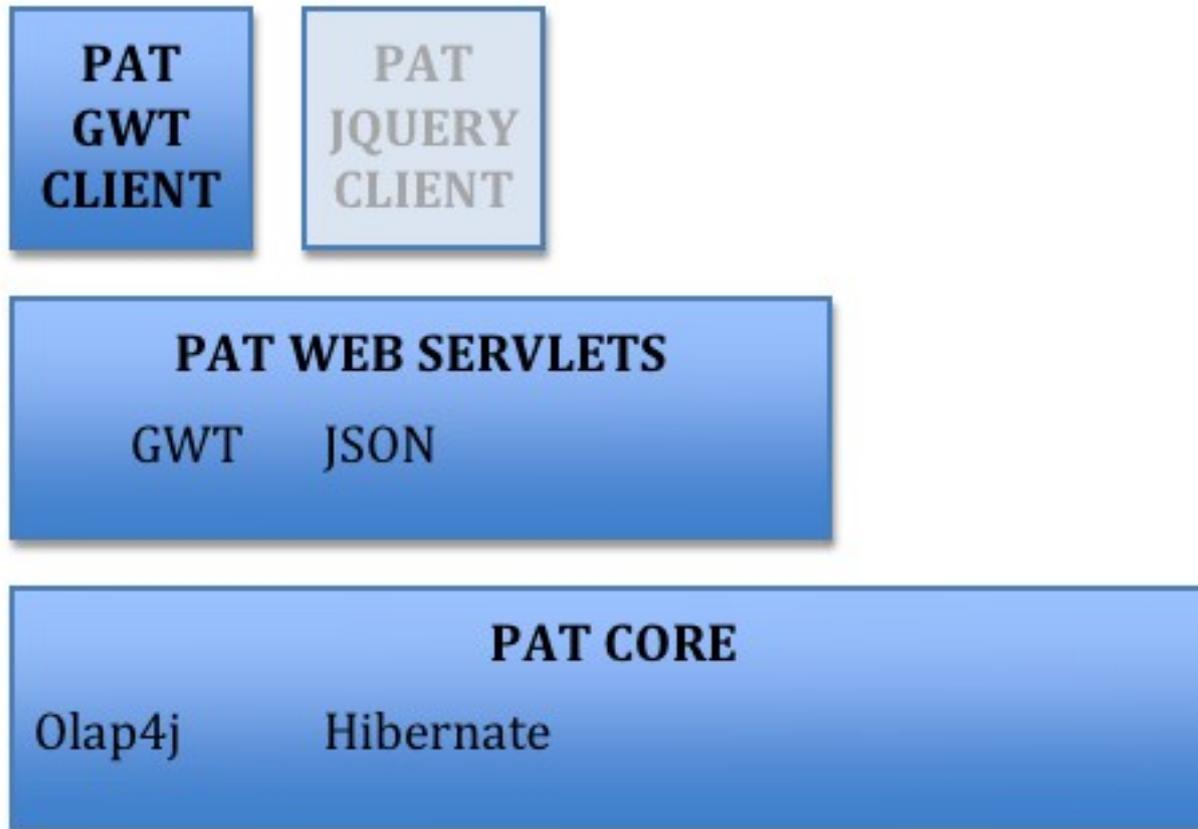

- Mondrian writeback
- Visual totals
- Calculated member wizard
- Sparklines
- 'Smart' cells
- Scriptable visualizations
- More drag and drop functionality

PAT Architecture 2.0

What about.....

PAT

WEKA

The screenshot shows the PAT Analysis Tool interface. On the left, there are tabs for 'Connections', 'Cubes', and 'Dash'. Below these is a 'Table' view. The table has a header with 'All Regions' repeated for five categories: Central, Eastern, Southern, and Western. The table contains data for various departments and measures. A large blue cross is overlaid on the right side of the image, pointing towards the WEKA interface.

Dimensions	Measures	Central	Eastern	Southern	Western
Unused					
Measures	Executive Management	143,639,882.00	37,893,192.00	35,248,940.00	35,248,940.00
	Finance	6,299,022.00	1,776,282.00	1,507,580.00	1,507,580.00
	Human Resources	12,224,220.00	3,196,680.00	3,039,180.00	3,039,180.00
